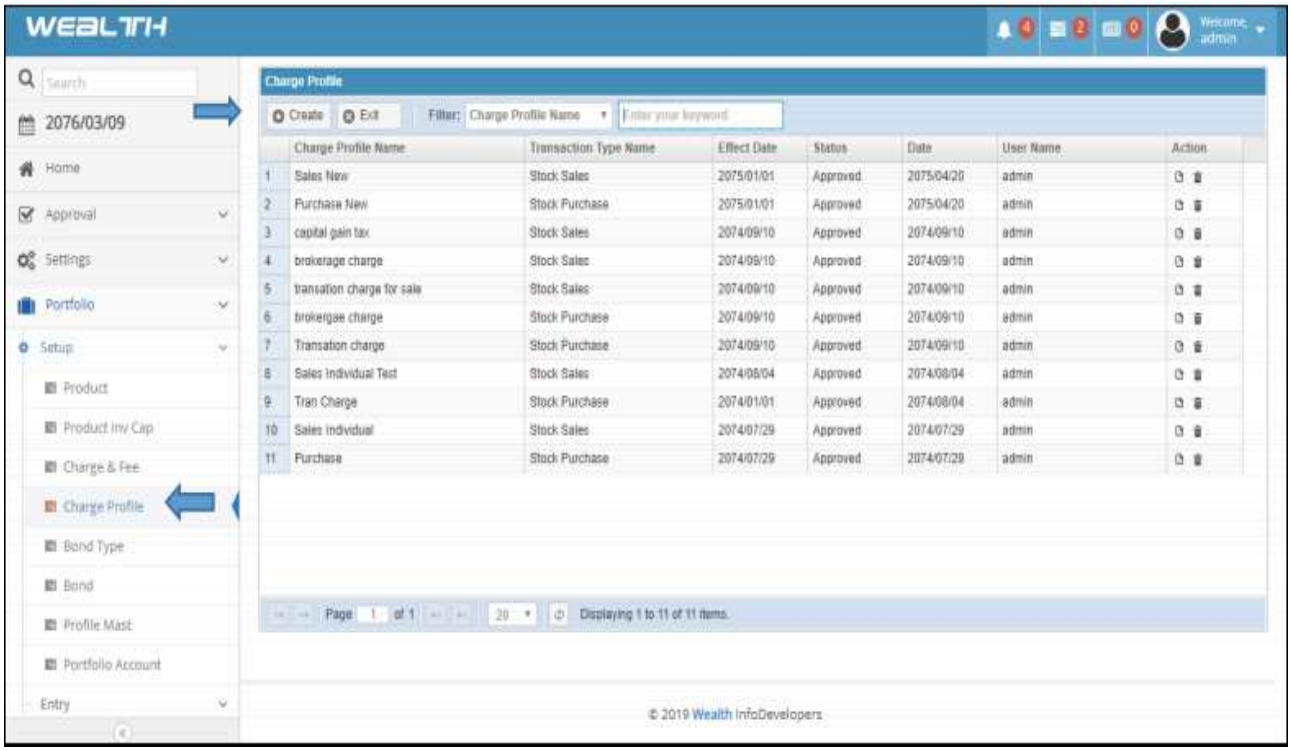
Charge Profile - User Manual

Normally there are different types of Charge profile that an admin can create according to the transaction, whether buy or sales. Each profile has its own price. So charge profile is used to setup the cost of a profile. This page displays the approved and unapproved data of a charge profile. Action has three option: View, Edit and Delete but the approved data cannot be edited.

User can create the Charge Profile by Clicking on "Create" button at the top left side of the interface.



When "Create" button is clicked, the vacant form is displaying where;

*Charge Profile name is the name of the cost profile name like; sales, purchase, capital gain taxes and others.

*Tran Type displays the dropdown menu whether the stock purchase or stock sales.

*Effect date is the current date.

*Product Select is the product which was created in the **Product** previously and the drop down menu displayed there fetches from the Product automatically.

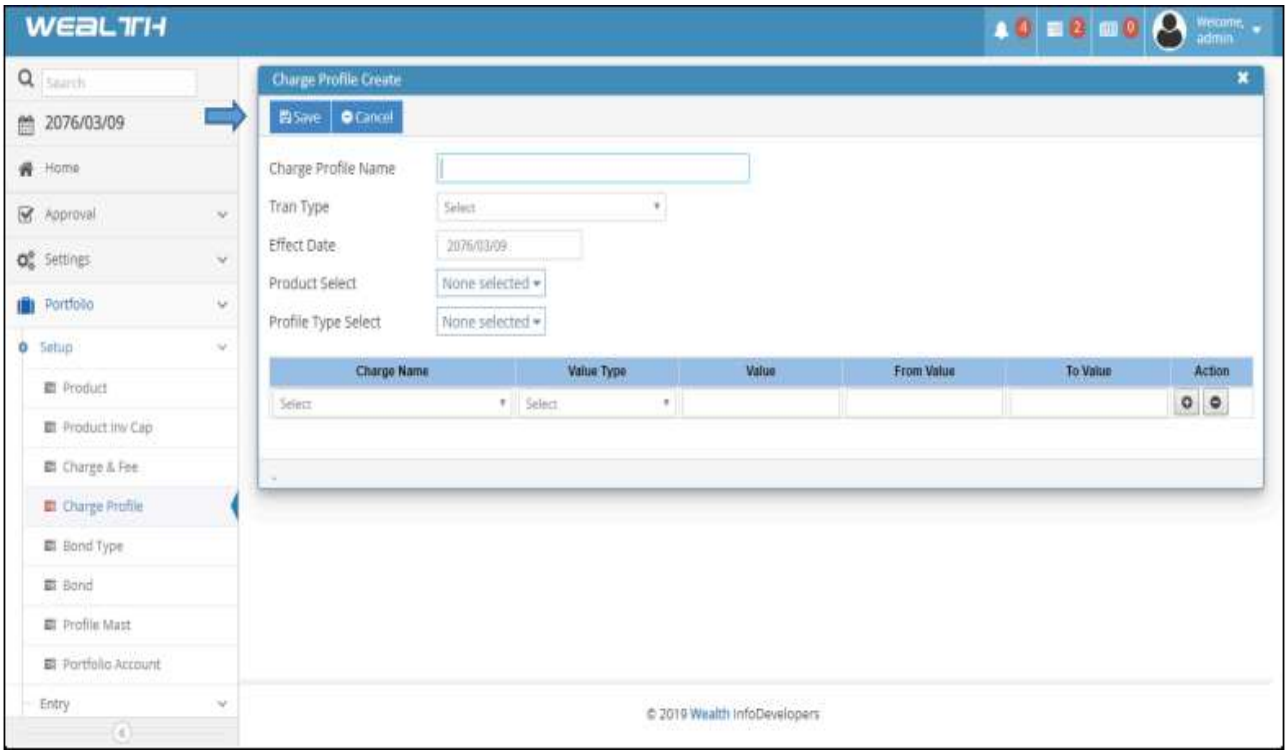
*Product type select gives two option in drop down menu and the admin would select whether it is individual or institutional.

*Charge name displays dropdown menu for the charges for the purchase and sales,

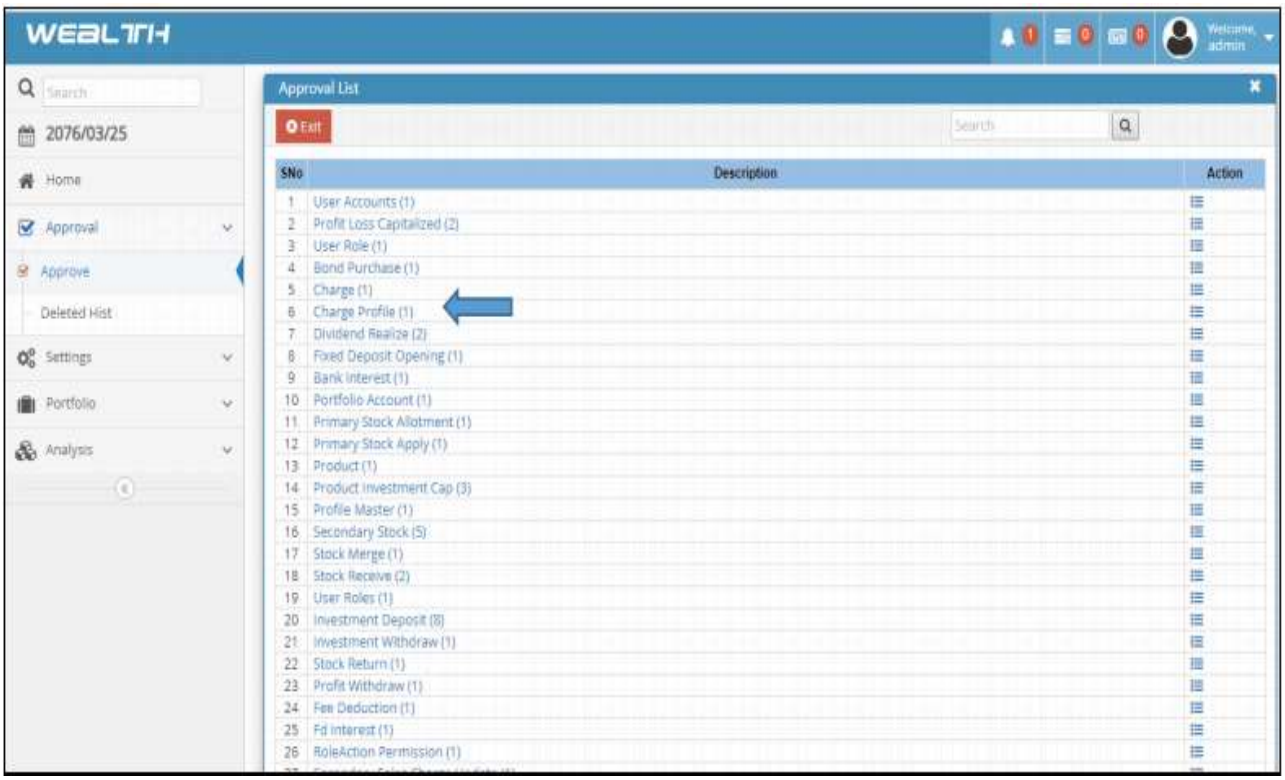
*Value type is the selection of percent or flat charges according to the charges name which have existing drop down menu.

*value is according to the Value type and the "from value" to "To value" is the margin of transactional amount in which charges is applicable.

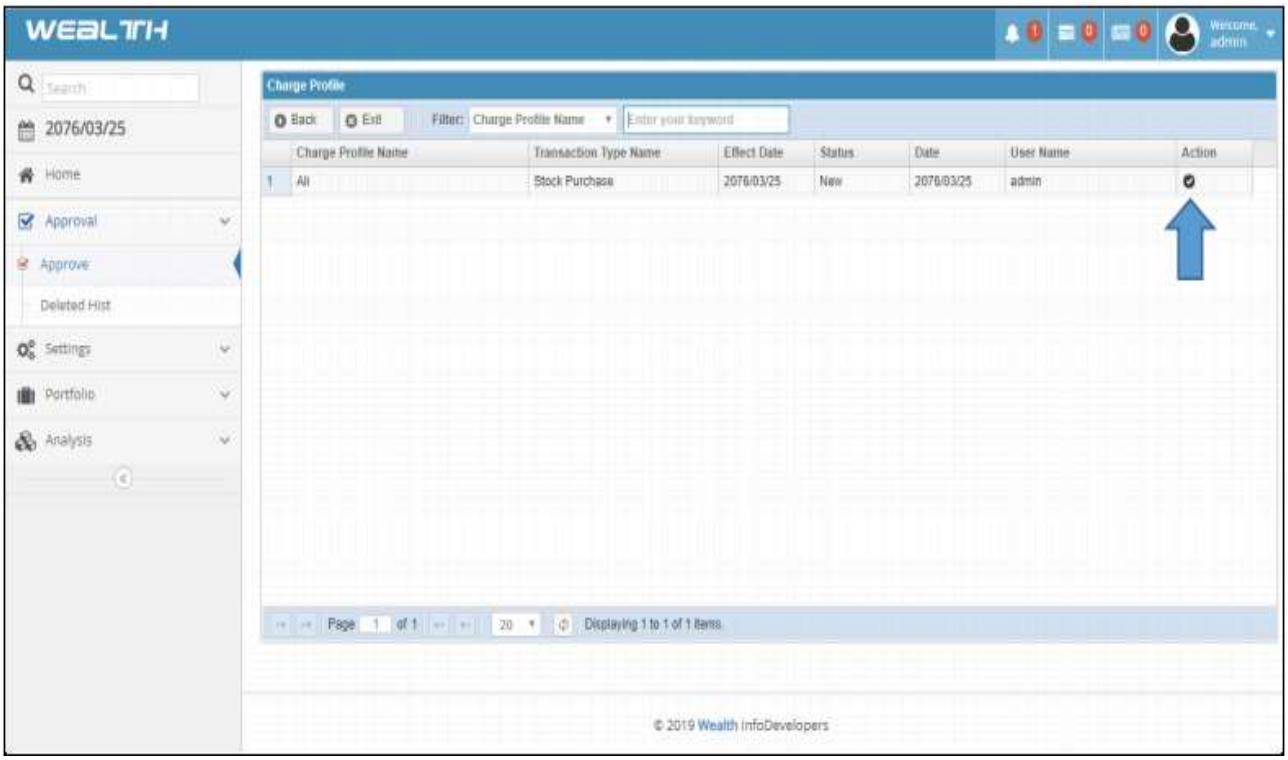
When the form is filled with correct data then click the **Save** button.



After saving the form go to the **Approval** section below the Home and click on **Approval** and then click on **Approve**. And select the **Charge Profile.**



After the selection of Charge Profile; the screen for the Charge profile will display then Click on the "Action" button on the right side of the displaying screen.



After clicking on Action; The screen for the Charge Profile Approve is displaying. Clicking on **Approve** button, the forms filled previously on the Create Screen will Approve and the Charge profile will create.
